

It took years to make it a farm... It takes one call to keep it safe.

The soil on your farm or ranch is rich with nutrients and minerals... AND underground gas, oil and water pipelines as well as electric, telephone and TV cables. Utilities that your family, friends and community depend on every day.

Excavation activities like terracing projects, fence post installation, tiling, subsoiling or building waterways can create safety hazards due to the depth of the excavations.

Plan to DIG SAFELY when beginning these projects.

CALL BEFORE YOU DIG in order to notify utility companies who may be affected by the excavation. This service is FREE.

No one digs more dirt than America's farmers and ranchers. Understanding what is below ground will help you DIG SAFELY above ground. Take care in farming, plowing, and excavating. CALL BEFORE YOU DIG!
